Abhijit Chowdhary

STUDENT AT NYU

Abhijit Chowdhary, 9331 Ridings Way, Laurel, MD

Mathworks Natick, MA

January 18, 2019

Dear Sir or Madam,

I am writing this cover letter as an introduction for my application for the position of Software Engineer in Test Intern for Numerical Algorithms at your company of Mathworks.

Mathworks work on Matlab has been something I've spent a significant amount of my academic career working with. I remember in my freshman year, when implementing a QR iteration for my numerical computation class, I found out that Matlab ran the same code in minutes, rather than the hours taken by Octave. I realized that this difference was coming from the bottleneck in the actual QR factorization; but I couldn't see what black magic you used to achieve this. To this day I'm still interested in how you guys managed to get it to perform at that level, and if I start in this position, I hope to help create performant algorithms like that. I've spent lots of my academic career studying numerical methods, from taking the PhD numerical methods seminars, to applying it in a Geometric Modeling or Algebraic Number Theoretical context. By using the theory I gained here I hope to help as much as I can. Technically I am an undergraduate while the position calls for a master's or PhD level candidate, but I've taken coursework at the PhD level for numerical methods and should be roughly equivalent.

If you are interested, please send me an email at abhijit9331@gmail.com, or a call to (240) 715-8308. Finally, thank you for taking the time to review my application, have a good day.

Sincerely yours, Abhijit Chowdhary.
